Sperry at World Maritime University

The World Maritime University in Malmö, Sweden, was inaugurated during the summer by Mr C P Srivastava, Secretary General of IMO. The new university will place particular emphasis on training people from developing nations to enable them to take up high-level posts within their national marine industries. Sperry equipment will be used at the university. Pictured below is a mock-up bridge with a CAS II ARPA, while at right Rune Persson of C A Clase AB, who designed the bridge layout and supplied the equipment, including a Sperry Gyropilot, discusses the CAS II ARPA with Mr Srivastava (right) and US Admiral Sheldon Kinney (centre), his special adviser.
